Agents League Hackathon

An AI developer challenge running between June 4- 14, 2026 with live coding battles, community building, and competition.

Build innovative AI agents for Creative Apps, Reasoning Agents or Enterprise Agents categories. Compete for recognition, network with developers globally, and get feedback from Microsoft product teams. This time, all projects must integrate with at least one of the **Microsoft IQ** intelligence layer: Foundry IQ, Work IQ, or Fabric IQ.

 **Important:** Before submitting, read our [Disclaimer](#) - do not upload confidential information.

What's Agents League?

- 🏆 **Recognition** - Winners earn amazing prizes

Open to everyone - all skill levels welcome! Watch the battles for inspiration, then build one project or compete in all three tracks.

Use AI assisted development with tools like [GitHub Copilot in VS Code](#), the [GitHub Copilot CLI](#), or the [GitHub Copilot CLI SDK](#).

Challenge Tracks

Pick one or compete in all three!

<u>Track</u>	<u>Tool</u>	<u>Challenge</u>
 Creative Apps	GitHub Copilot	Build innovative creative applications using AI-assisted development
 Reasoning Agents	Microsoft Foundry	Create intelligent agents that solve complex problems through multi-step reasoning
 Enterprise Agents	Microsoft 365 Copilot	Build business-ready agents for Microsoft 365 Copilot

💡 **Microsoft IQ — Required**

All submissions must integrate at least one **Microsoft IQ** intelligence layer:

<u>IQ Layer</u>	<u>What It Does</u>
Foundry IQ	Agentic knowledge retrieval for AI agents - connects multiple enterprise sources, enforces permissions, and delivers cited, grounded answers to reduce hallucination
Work IQ	The intelligence layer behind Microsoft 365 Copilot - builds memory from emails, meetings, chats, and documents to understand work context, people and relationships
Fabric IQ	Semantic intelligence layer for Microsoft Fabric - uses ontologies and knowledge graphs to give business meaning to enterprise data, enabling AI agents to reason over real business concepts

You can use **any** of the IQs in **any** track — pick whichever fits your project best.

📖 **Learn more:** [Microsoft IQ Series](#) — Deep-dive sessions on Foundry IQ, Work IQ, and Fabric IQ.

How to Participate

- 👉 Click **Register** Above to Activate Your Profile

Activation gives you:

- ✅ Official participant status
- ✅ Eligibility for prizes and recognition
- ✅ Digital badge when you submit your project

2. Choose Your Track

-  **Creative Apps** - Build with GitHub Copilot
-  **Reasoning Agents** - Build with Microsoft Foundry
-  **Enterprise Agents** - Build agents for Microsoft 365 Copilot

3. Watch & Learn

Live Battles on [Microsoft Reactor](#)

- Tue June 9, 9 AM PT -  Creative Apps
- Wed June 10, 9 AM PT -  Reasoning Agents

- Thu June 11, 9 AM PT -  Enterprise Agents

4. Build Your Project - Click Challenges Above to Get Started

- Follow your Challenge instructions
- Create something unique and functional
- Make a demo video

5. Review Your Project

Submission Deadline: June 14, 2026

 Before submitting:

- Read the [Disclaimer](#) [🔗] - No confidential information allowed
- Review the [Code of Conduct](#) [🔗]
- Ensure your repository is public and includes a README

6. Submit by Clicking Projects Above

7. Join the Community

- [Get help, share progress, vote for favorites](#) [🔗]
- [Microsoft Discord Community and Guidance](#) [🔗]
- [If you have product feedback or errors while building, visit Microsoft Foundry Developer Forum](#) [🔗]

Prizes & Recognition

 For All Participants

- Digital Badge - Everyone who registers and submits a project receives a digital badge

 For Category Winners

<u>Challenge Category</u>	<u>Prize Package Includes</u>	<u>Fair Market Value (USD \$)</u>
 Best Overall Agent	* A cash prize, to be awarded as an e-Mastercard (\$15,000 USD)* A Swag box (\$500)* Digital dev toolkit, including Azure Credits (\$500)* 1 year GitHub Copilot Pro+ plan (\$468)	\$16,468
 Best Creative App	* A cash prize, to be awarded as an e-Mastercard (\$5,000 USD)* A Swag box (\$500)* Digital dev toolkit, including Azure Credits (\$500)* 1 year GitHub Copilot Pro+ plan (\$468)	\$6,468
 Best Reasoning Agent	* A cash prize, to be awarded as an e-Mastercard (\$5,000 USD)* A Swag box (\$500)* Digital dev toolkit, including Azure Credits (\$500)* 1 year GitHub Copilot Pro+ plan (\$468)	\$6,468
 Best Enterprise Agent	* A cash prize, to be awarded as an e-Mastercard (\$5,000 USD)* A Swag box (\$500)* Digital dev toolkit, including Azure Credits (\$500)* 1 year GitHub Copilot Pro+ plan (\$468)	\$6,468
 Best Use of IQ Tools	* A cash prize, to be awarded as an e-Mastercard (\$5,000 USD)* A Swag box (\$500)* Digital dev toolkit, including Azure Credits (\$500)* 1 year GitHub Copilot Pro+ plan (\$468)	\$6,468

 Top Student Award	* Swag box (\$500.00 USD)* Digital dev toolkit, including Azure Credits (\$500.00 USD)* 1 year GitHub Pro+ plan (\$468.00 USD)	\$1,468
 Accessibility Award	* Swag box (\$500.00 USD)* Digital dev toolkit, including Azure Credits (\$500.00 USD)* 1 year GitHub Pro+ plan (\$468.00 USD)	\$1,468
 Hack for Good Award	* Swag box (\$500.00 USD)* Digital dev toolkit, including Azure Credits (\$500.00 USD)* 1 year GitHub Pro+ plan (\$468.00 USD)	\$1,468

Judging

Projects are evaluated by experts and product teams using this rubric:

- **Accuracy & Relevance (20%)** — Meets challenge requirements
- **Reasoning & Multi-step Thinking (20%)** — Clear problem-solving approach
- **Creativity & Originality (15%)** — Novel ideas or unexpected execution
- **User Experience & Presentation (15%)** — Clear, polished, demoable
- **Reliability & Safety (20%)** — Solid patterns, avoids obvious pitfalls
- **Community vote (10%)** via the Discord poll available at <https://aka.ms/agentsleague/discord>

Community & Support
